

# RESOURCES AND SUPPORT

---

For your treatment journey with  
LONSURF® (trifluridine/tipiracil) [LON-serf] tablets

---

LONSURF is a prescription medicine used to treat adults with

- colorectal cancer that has spread to other parts of the body and who have been previously treated or cannot receive certain chemotherapy medicines.
- a kind of stomach cancer called gastric cancer including cancer of the gastroesophageal junction that has spread to other parts of the body and who have been previously treated or cannot receive certain chemotherapy medications.

It is not known if LONSURF is safe and effective in children

**Please see Important Safety Information on back cover and full Prescribing Information in pocket.**

## FOR PATIENTS TAKING LONSURF

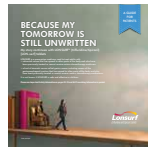

The following resources are just some of the tools available to support you while you're taking LONSURF® (trifluridine/tipiracil) tablets

- **Dosage Calendar:** Helps you keep track of your doses, temperature, and any side effects you may experience. Your healthcare provider may give you a treatment calendar, or you can create a personalized calendar at [LONSURF.com/mycalendar](https://LONSURF.com/mycalendar).

- **LONSURF Starter Kit:** The kit is meant to help you with your treatment plan. It includes helpful items, some of which are also available for download on the website. The kit includes the Patient Brochure, the Caregiver Brochure, a thermometer to help you track your temperature, and 2 sets of pillboxes—one for days 1-5 and one for days 8-12—to help you organize your medicine. Your healthcare provider may give you a kit, or you can request one by calling **1-844-TAIHO-4U** (1-844-824-4648) or visiting the link below.

- **Patient Brochure:** Contains helpful information regarding how LONSURF treats colon/rectal cancer and stomach/gastroesophageal junction cancer, as well as tips for managing side effects and obtaining financial support. The brochure is included in your LONSURF Starter Kit, or you can download it at the link below.

For more support during your treatment journey, visit [LONSURF.com/resources](https://LONSURF.com/resources)

### Selected Important Safety Information

- **Low blood counts.** Low blood counts are common with LONSURF and can sometimes be severe and life-threatening. LONSURF can cause a decrease in your white blood cells, red blood cells, and platelets. Low white blood cells can make you more likely to get serious infections that could lead to death. Your healthcare provider should do blood tests before you receive LONSURF, at day 15 during treatment with LONSURF, and as needed to check your blood cell counts. Your healthcare provider may lower your dose of LONSURF or stop LONSURF if you have low white blood cell or platelet counts

## FOR CAREGIVERS OF THOSE TAKING LONSURF

The following brochure is available as you support your loved one taking LONSURF

- **Caregiver Brochure:** Provides an overview of LONSURF and how it is taken, useful tips that may help manage common side effects, and strategies for taking care of yourself and your loved one. The brochure is included in the LONSURF Starter Kit, or you can download it at the link below.

For additional support, visit [LONSURF.com/caregivers](https://LONSURF.com/caregivers)

The materials provided are not meant to replace your healthcare provider's advice.

Always speak with your healthcare provider about any questions or concerns you have so he or she can develop a personalized treatment plan based on your needs.

**Taiho Oncology Patient Support™** is your online and on-call resource center for any questions or needs related to financial assistance, reimbursement, and your treatment with LONSURF tablets.

To learn more, visit [TaihoOncologyCopay.com](https://TaihoOncologyCopay.com).

If you haven't received your **LONSURF Starter Kit**, call **1-844-TAIHO-4U** (1-844-824-4648).

## Important Safety Information

### **LONSURF may cause serious side effects, including:**

- **Low blood counts.** Low blood counts are common with LONSURF and can sometimes be severe and life-threatening. LONSURF can cause a decrease in your white blood cells, red blood cells, and platelets. Low white blood cells can make you more likely to get serious infections that could lead to death. Your healthcare provider should do blood tests before you receive LONSURF, at day 15 during treatment with LONSURF, and as needed to check your blood cell counts. Your healthcare provider may lower your dose of LONSURF or stop LONSURF if you have low white blood cell or platelet counts

Tell your healthcare provider right away if you get any of the following signs and symptoms of infection during treatment with LONSURF: fever, chills, or body aches.

### **Before taking LONSURF, tell your healthcare provider about all of your medical conditions, including if you:**

- Have kidney or liver problems
- Are pregnant or plan to become pregnant. LONSURF can harm your unborn baby.
- **Females** who can become pregnant: Your healthcare provider will verify your pregnancy status before you start treatment with Lonsurf. You should use effective birth control during and 6 months after the last dose of treatment with LONSURF. Tell your healthcare provider immediately if you become pregnant
- **Males**, while on treatment and for 3 months after your last dose of LONSURF, you should use a condom during sex with female partners who are able to become pregnant. Tell your healthcare provider right away if your partner becomes pregnant while you are taking LONSURF
- Are breast-feeding or plan to breast-feed. It is not known if LONSURF passes into your breast milk. Do not breast-feed during treatment with LONSURF and for 1 day after your last dose of LONSURF

Tell your healthcare provider about all the prescription and over-the-counter medicines, vitamins, and herbal supplements you take.

The **most common side effects** with LONSURF include tiredness (fatigue, weakness), nausea, decreased appetite, diarrhea, vomiting, abdominal pain, and fever.

Tell your doctor if you have nausea, vomiting, or diarrhea that is severe or that does not go away.

These are not all of the possible side effects of LONSURF. For more information, ask your healthcare provider. Call your doctor for medical advice about side effects.
